Your KNX project with B.E.G.

Dear business partners,

we offer the right devices and services for your sophisticated KNX project. Surely you are familiar with our B.E.G. sensors? Our KNX motion and presence detectors have been used worldwide for decades in building automation.

In addition, B.E.G. offers numerous system components such as switching actuators, dimming and control actuators, room control elements and gateways, so that your KNX project can be set up completely in high-quality B.E.G. quality. Up-to-date BIM data and comprehensive tender texts help you to plan your project successfully. With special products such as ViStation and DALI/KNX gateway, you can also implement projects with special visualisation requirements or cross-system interfaces.

From A-Z - we at B.E.G. are always at your side as a reliable full-service KNX provider. Benefit from our KNX consulting and service offers. Our employees will be happy to help you with project planning and device selection. Please speak to your familiar B.E.G. sales representative or contact us at louis.oberholster@beg-luxomat.au.

We look forward to working on KNX projects together.

Our project service for your plans and innovative buildings

B.E.G. offers a wide range of services, customised to your needs. Our team of experts offer you a comprehensive service. In addition to our competent sales field service, we also offer you our project service.

1. Recording the customer requirement
   The project will be discussed with you in detail, no matter how much time we need together.

2. Creation of a system design
   Based on the consultation, we create a system design for you in which we create a technically economical and ecological system design. Whether server solution, KNX or DALI2. We offer you the right solution. This also includes validation in accordance with DWG sensor planning.

3. Sensor planning
   Simply outsource the sensor planning in a project free of charge? Gladly, with us always. With our planning service, we offer you an elaboration created by our experts with years of experience.

4. Project support
   We work with you to successfully complete the project. Our project service is on hand with help and advice.

5. After-Sales-Service
   Once the project has been successfully completed, we will continue to support you with our after sales service. Even if something does not work as it should, we will always find a solution with you.
